YOUR MEETING KIT: **TWELVE WEAPONS**

Everything to win the meeting, in the order you use it. The papers for the room (10 to 12) and the deck never name the admin's tools: the Showcase, View as, the spotlight and the calculator stay a surprise until you use them.

WHEN	#	WEAPON	WHAT IT DOES FOR YOU	WHERE
Before	01	**Meeting-room checklist**	The room, the screen and the files tried the day before, and what to do when something fails.	01 Meeting-room checklist.pdf
Before	02	**Who is in the room**	Each person's worry, the sentence that answers it, and the screen that proves it.	02 Who is in the room.pdf
Before	03	**Demo run sheet**	Twenty minutes, minute by minute: what to click, what to say, and the way round each failure.	03 Demo run sheet.pdf
Before	04	**Hard questions**	Twenty-two questions managers ask, each with a short and true answer.	04 Hard questions.pdf
During	05	**Demo file**	The tool on a made-up month: opens on any computer, no folder, no sign-in, nothing saved; every page, every role, View as and the Showcase.	05 Cadence - Demo.html
During	06	**Live drop pack**	A spare: the month's four exports, made up, only if someone asks how the numbers get in.	06 Live drop pack (made-up, Sep 2026)
During	07	**Spotlight and zoom**	S lights the part you are talking about, Z enlarges where you point, + and - change the size, Esc takes them off.	In the tool (admin only)
During	08	**What it gives back**	The room types its own hours; the Showcase turns them into hours and working days back a year.	Showcase (admin only)
During	09	**Backup video**	A month in the tool in under two minutes, with captions, for a room where nothing works.	09 Backup demo video.mp4
After	10	**Leave-behind**	One page: the idea, what Member Care and each role get, how the data stays private, what comes next.	10 Leave-behind.pdf
After	11	**IT and security note**	One page for IT: what runs where, what is encrypted, the review, and the limits.	11 IT and security.pdf
After	12	**The ask and the follow-up**	A pilot proposal with its success measures, and the email that sends it the same day.	12 Pilot proposal.pdf · 12 Follow-up email.eml

FOUR RULES

Keep them hidden

Nothing in the deck, the leave-behind or the email names your tools. Open them when the moment comes.

Show made-up people

Use the demo file whenever the room is wider than the people who may see the data.

Let them say the number

Ask the room for its hours and type them (08). A number they gave is a number they believe.

End with the ask

Close on the pilot (12) and a date for the decision. Send the email the same day.
