CADENCE · MEMBER CARE PERFORMANCE

Member Care's month, in one place. One shared truth for the whole month: the numbers every role works from, settled before they count, and explained to the person they touch.

Settled before it counts
Problems are decided before anything goes out.

Every bonus explains itself
Each KPI, band, ranking and point, for every person.

A page for every role
Seven roles on one set of data, in English or Arabic.

WHAT MEMBER CARE GETS

Time back
188 hours a month: 5 a day for the WFM analyst, 3 a day for the WFM manager, 2 a month for each QA, CT and TS supervisor and manager.

The month at a glance
Managers see where the close stands, what is late and who is next.

No single point of failure
Shared, saved and covered during holidays: never one person's spreadsheet.

Coaching on the same facts
One-to-ones filled from the month's numbers; questions answered in one place.

EVERY ROLE

WFM analyst	Time for analysis, not assembling
WFM manager	Checked numbers, sent on time
Senior manager	The whole close; the final say on the rules
Supervisor	More coaching, less paperwork
Quality team	Quality entered once, counted everywhere
Agent	Own results, understood, in English or Arabic
Admin	Each person in their role

PRIVATE BY DESIGN

- **0 web requests.** Nothing is sent anywhere: the data stays on our own computers.
- **AES-256.** The shared data is encrypted; only accounts made in the tool can read it.
- **No National IDs** in email attachments.
- **By role.** An agent sees only their own page; a supervisor, only their team.
- **Logged.** Results, rules and roles: who changed what, and when.

WHAT COMES NEXT

1. Run the next month end in Cadence, the old way beside it for one month.
2. Measure what it gives back: hours, corrections and questions about pay.
3. Make it how we close: every month, every role, one shared truth.

The KPIs are worked out in the tool. Tested before every change: 10,000 made-up people through every counting rule and 37 browser test suites.
