CADENCE · MEMBER CARE PERFORMANCE

Member Care's month end, in one place. One offline file turns the month's Genesys exports into the monthly workbook, the incentive data, the emails and the one-to-ones.

Checked before it is built
Nothing goes out until the checks are decided.

Every bonus explains itself
Each KPI, band, ranking and point, for every person.

A page for every role
Seven roles on one set of data, in English or Arabic.

A MONTH IN FOUR STEPS

1 Import
Drop every file of the month at once; each is recognised by what is inside.

2 Review
The checks list what needs a decision before anything is built.

3 Export
The monthly workbook and the incentive data, built in one click.

4 Emails
Deduction, absence and incentive emails, ready to send from Outlook.

EVERY ROLE

WFM analyst	Builds the month and the daily emails
WFM manager	Sends the emails; sees the analytics
Senior manager	Keeps the rules; finalizes the month
Supervisor	The team, attendance (exceptions only), one-to-ones
Quality team	The Final EVAL, entered once
Agent	Own results, in English or Arabic
Admin	Accounts and roles for everyone

PRIVATE BY DESIGN

- **0 web requests.** Opened as a file, the browser itself refuses every web address.
- **AES-256.** The shared data is encrypted; only accounts made in the tool can read it.
- **No National IDs** in email attachments.
- **By role.** An agent sees only their own page; a supervisor, only their team.
- **Logged.** Results, rules and roles: who changed what, and when.

HOW WE START

1. Put the HTML in the common folder, next to MC Data.
2. Open it in Edge or Chrome on a computer: nothing to install.
3. Everyone makes an account; the admin gives each person their role.

The KPIs are worked out in the tool. Tested before every change: 10,000 made-up people through every counting rule and 36 browser test suites.
